Wasp in Dreams

Dreaming about a wasp is associating yourself back to a situation that has stung you in the past where you are most hurt and vulnerable. In return, the hatred towards this helplessness has grown in you. However, it is not a healthy situation because the energy required to hate someone or something is tremendous, which keeps you from being optimally functional throughout the waking hours.

To move forward, you must kill the wasp in your dreams. Take over the fear, and continue with your life.
